Summary

A passionate web developer with experience in working on large scale data-driven AngularJS app, and developing responsive web pages. Known to be a quick learning, super-focused developer delivering high quality code consistently. Loves JavaScript. Bookworm, easy going fun-to-work-with guy. Proficient in JavaScript (including the new ES6 features), React, Redux, Git, Configuring Webpack, Babel, ESLint, and Responsive Web Design.

Technical Skills

Languages, Frameworks, and Tools

- JavaScript (good with ES6), ReactJS, Redux
- Webpack, Babel, ESLint
- AngularJS (1.x)
- HTML, CSS, Less, SCSS, Bootstrap, Flexbox, BEM
- Core Java
- Git, NPM, Yarn
- Karma, Jasmine
- NodeJS, ExpressJS
- Postman
- Heroku, Zeit
- Markdown
- Writing effective documentation using JSDoc

Other Skills

- Effective communication
- Experience in Scrum methodology
- Working effectively with teams spread over countries
- Mentoring junior members of the team

Side Projects

- Hacker News Clone

    - A Hacker News clone built using plain React, native fetch to get data from Hacker News Search API powered by Algolia. Live app deployed on Heroku.
    - [Live App](#)
    - [Source Code](#)

- Decide it for me App

    - Built using React, Webpack, Babel, ESLint, SCSS, and Flexbox.
    - Lets the user enter some options they are confused with, and selects a random option (call it fate, if you will :P)
    - [Live App](#)
    - [Source Code](#)

- Minimalistic React Boilerplate

    - A minimalistic boilerplate for React projects with configuration for Webpack, Bable, ESLint. Supports SCSS out of the box.
    - [Source Code](#)

- Counter App

    - Built using React and Redux.
    - [Live App](#)
    - [Source Code](#)

- Weather App

    - A simple weather app to get my hands dirty with asynchronous programming in JavaScript. Built using axios, request and yargs npm moduels.
    - [Source Code](#)

- JS Monk

    - Just a collection of random programs that I write as I go through my pilgrimage of understanding JavaScript.
    - [Source Code](#)

- Note App

    - A command line note app to understand NodeJS fundamentals.
    - [Source Code](#)

- [Other small projects](#)

Experience

Web Developer at GreatWest Global

June, 2016 - current

- Translated complex wireframes into semantic HTML web pages
- Worked on making existing web pages responsive using Twitter Bootstrap
- Gave a talk on 'Building your own Bootstrap: Fundamentals of Responsive Web Design' in Knowledge Exchange Forum at the company. ([Code used in demo](#))
- Created a Postman Collection that saved a lot of time for developers while testing RESTful API

services

- Mentored junior members to integrate seamlessly into the team
- Collaborated effectively with teams spread across countries
- Worked in Agile methodologies (Scrum)
- Collaboration via JIRA, and Confluence

Education

- **CGPA: 8.8**, B.E in Computer Science and Engineering, BMS College of Engineering, affiliated to VTU.
- **96.2%**, 12th, CBSE, JNV Chitradurga.
- **CGPA:10**, 10th, CBSE, JNV Chitradurga.

Other notable achievements

- **National Topper (NVS)** in CBSE 10th Examination, 2010
- Recipient of Merit Certificate for being in **top 1%** in the country in CBSE 10th Examination, 2010
- Awarded INSPIRE Scholarship for being in **top 1%** in the country in CBSE 12th Examination, 2012
- Represented my school, JNV Chitradurga in Regional Science Congress held at University of Hyderabad, 2010
- Participated in CSIR Programme For Youth On Leadership In Science held at CFTRI, Mysuru in 2011 (Participants were top 50 students from the state of Karnataka)
- Recipient of MHRD Scholarship
